

## Ginecología

# **Xith ADVANCED LAPAROSCOPIC WORKSHOP ON FEMALE PELVIC SURGICAL ANATOMY ON UNENBALMED CADAVERS**

Código del curso: MHE17010001. **11 plazas disponibles**

Calendario:

10-11 March, 2017

Número de plazas:

12 plazas (**11 disponibles**)

Precio de inscripción:

2000 euros.

## **Organización**

ICGON Instituto Clínic de Ginecología, Obstetrícia y Neonatología - Ginecología

## **WHAT IS THE CORE OF THE COURSES?**

The essence of the workshop is **SURGICAL ANATOMY**. Not anatomy, nor surgical technics.

But what surgical anatomy is? The technics that give us the opportunity to turn a map (anatomy) on to a road book and therefore allow us to answer, at all times, the three main questions related to safety during a surgical procedure:

- What is that?
- Where is it?
- Which way?

## **AUSPICES**

Requested auspice of the AAGL

## **HOW ARE WE DOING IT?**

Ascending three steps:

1-Review of pelvic anatomy: theoretical lecture, with three main items supporting the lecture:

- Schemes
- Atlas imaging
- Video sequences of dissections or real surgery

2-Learning and understanding what is surgical anatomy, and thus constructing our road book through female pelvis: theoretical lecture

3-Doing it in the dissection room: practical session hands on in unembalmed female cadavers, with just two attendants for each corpse.

## **FACULTY**

Members of both gynaecology and anatomy departments and expert specialists invited from all over Spain.
